Dear Jane Henney, FDA Commissioner

I would like to write to you on 2 issues.

1. Please look into the very important controversy regarding the labelling of irradiated foods. I feel it is vital for each of us to know what has happened to the food we purchase in the store or in a restaurant. Please use your office and influence to assure that irradiated foods carry proper labelling on the package.
2. I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. The more I read on this issue I am more aware and frightened that soon we will have resistant bacteria and when we get sick there will not be medicine for us to take that still has power over the bacteria. So I support the petition filed by CSPI.

Thank You. SheilaMarkman
